

Roles and Responsibilities of Team Members

Team Members

- **Mohammad Jamal Naser Sekandari**
- **Kunwar**

Mohammad Jamal Naser Sekandari

Role: AI System Developer and Documentation Lead

Responsibilities:

- Conduct research on AI agents, Retrieval-Augmented Generation (RAG), and drug discovery.
- Design the overall system architecture.
- Develop the retrieval-based AI workflow.
- Implement the persistent memory functionality.
- Integrate and test the AI components.
- Write the project report and short paper.
- Prepare technical documentation.
- Create and organize presentation materials.
- Present the project during the final demonstration.

Kunwar

Role: API Integration and System Testing Lead

Responsibilities:

- Research the PubChem database and its API.
- Implement PubChem API integration.
- Develop the dynamic orchestration workflow.
- Test system functionality and debug issues.
- Validate retrieval accuracy and API responses.
- Assist in developing the final product.
- Prepare PowerPoint slides and demonstration materials.
- Support the live presentation and answer technical questions.

Shared Responsibilities

Both team members collaborated on:

- Project planning and task scheduling.
- System design discussions.
- Feature implementation and integration.
- Reviewing and improving the project documentation.
- Preparing the PowerPoint presentation.
- Conducting the final product demonstration.
- Reviewing the final report before submission.
